SUMMARY

Software Engineer with experience in enterprise retail applications, full-stack development, AI/ML, and data analytics. Currently working as an ETP POS Application Engineer at Tata Trent, with hands-on experience in SQL, Linux, Java, Python, and modern development and ML technologies.

EXPERIENCE

ETP POS Application Engineer | Tata Trent Ltd.

June 2026 – Present

- Support and troubleshoot enterprise POS applications, investigating application and system issues to maintain reliable retail operations.
- Use SQL and Linux for database analysis, data validation, log investigation, and troubleshooting of production application issues.
- Collaborate with technical and business teams to analyze incidents, identify root causes, and implement application-level resolutions.

Software Development Intern | Lursell Business Machines

March 2025 – April 2025

- Developed backend functionality for a Gym Management System using Node.js, Express.js, and MongoDB.
- Implemented server-side logic, database interactions, and assisted with deployment and troubleshooting.

PROJECTS

OncoLens — AI-Based Cancer Prediction Platform

React, Node.js, Python, TensorFlow, Deep Learning

- Developed an AI-based cancer prediction platform using clinical and gene-expression data for cancer type classification, stage prediction, and survival risk estimation.
- Trained and evaluated FNN, DNN, and RNN models, achieving up to 92% accuracy, and integrated the models with a React and Node.js application for interactive predictions.

Manodarpan — AI Mental Health Assessment Platform

Flutter, Flask, Python, NLP, Firebase

- Developed a multilingual mental health assessment platform using GAD-7, PHQ-9, HAM-A, and HAM-D scales, with MuRIL-based emotion analysis and machine learning models for sentiment analysis.

Medicine Authentication System — Blockchain-Based Authentication

React, Vite, Ethereum, Solidity, Hardhat, MetaMask

- Developed a blockchain-based medicine authentication system using Ethereum smart contracts, with a React/Vite interface and MetaMask integration for secure verification.

TECHNICAL SKILLS

- Languages: Java, Python, JavaScript, SQL
- Development: React, Node.js, Express.js, Flask, REST APIs
- AI/ML & Data: TensorFlow, Scikit-learn, Pandas, NumPy, NLP, OCR, Power BI
- Databases & Tools: MySQL, MongoDB, Firebase, Git, GitHub, Linux, Postman, Hardhat, MetaMask

EDUCATION

Bachelor of Engineering (B.E.) in Information Technology | CGPA: 8.55

2022 - 2026

Datta Meghe College of Engineering

HSC (12th Grade) | 83.67% | St. Mary's Jr. College

2020 - 2022

SSC (10th Grade) | 92.40% | St. Mary's Multipurpose High School

2020

CERTIFICATIONS

- Data Science & Analytics Program — Imarticus Learning
- AWS Academy Machine Learning Foundations — AWS
- Python for Data Science, AI & Development — IBM
- Generative AI & Productivity Skills — Microsoft & LinkedIn

ACHIEVEMENTS

- IEEE Publication (2025): Research paper accepted and published in IEEE Xplore.
- HealthHack 2025 Finalist: Finalist at the VIT Bhopal & Johns Hopkins University USA Hackathon.
- InspireBiz 5.0 Finalist: Finalist at the VESIM Innovation Competition.
